EXPERIENCE:

River and Roads Directional Drilling, LLC

Project Manager

Weatherford, TX

4/2017 - present

Coordinates field operations for HDD rigs, crew, and equipment. Coordinates survey requirements, engineering specifications, and project logistics with client. Oversees day to day operations including horizontal directional drilling, slick bore, and auger bore pipeline installations. Estimate and prepare proposals for clients.

Boots Smith Oilfield Services, LLC

Senior Project Manager

Weatherford, TX

1/2015 – 4/2017

Executive level manager to oversee pipeline construction projects. Negotiate change orders with the client on any services or supplies that deviate from the original contract. These are issued on a daily basis and usually involve intricate allocation of costs and price within the contract guidelines. Issue purchase orders to subcontractors, vendors and suppliers as required to support the project. Responsible for overall planning, management, and execution of work. Maximize project profitability and promotes company objectives and goals. Monitor scheduling and progress of existing projects. Prepares estimates and proposals for pipeline construction projects.

Boots Smith Oilfield Services, LLC

Project Manager/Estimator

Weatherford, TX

1/2011 – 12/2014

Oversee day to day operations for various pipeline construction crews. Pipeline construction activities to include both rehab, integrity, new construction, and facility projects. Organize crews and equipment to perform pipeline installations from right of way to finished project and clean-up. Prepare estimates and proposals for pipeline construction projects.

Production Wireline Offshore

Lafayette, LA

Performed wireline well service duties on offshore oil well platforms. Loaded and offloaded all wireline equipment to and from crew boats. Serviced high profile clients such as BP both in the gulf and inland wells.

Progressive Pipeline, Inc

Purchasing Agent

Meridian, MS

7/2010-11/2010

Short term contract employee. Managed all the purchasing and supply contracts for the pipeline construction project in Madison, FL. This was a multi-million dollar project that demanded a massive amount of materials and supplies from several different vendors and manufacturers. Issued purchase orders to vendors and suppliers for the project. Scheduled timely delivery and coordinated with work schedules within the construction phases.

EDUCATION:

Delta State University

Cleveland, MS

Master's of Business Administration

2008

- ◇ Completed thesis requirements in 2004 by following a major US corporation for 6 months and presenting findings before a panel of peers and professors: Proctor & Gamble; More than a Household Company.
- ◇ Active alumnus member of Pi Kappa Alpha Fraternity; served in several leadership consultant capacities including fundraiser chairman, rush chairman, calendar committee, social chairman, pledge leader & community involvement.

Delta State University

Cleveland, MS

Bachelor's of Business Administration

2002

- ◇ Active member of Pi Kappa Alpha Fraternity; served in several leadership capacities including fundraiser chairman, rush chairman, calendar committee, social chairman, pledge leader & community involvement.

Training and Certifications

- Safegulf / Safeland (IADC Rig Pass)
- OSHA 30 HR
- Confined space training (7hr)
- Water survival / Multi-seat Triton Huet simulator training / Swing rope / Personnel basket
- Offshore Rigger Safety
- Defensive driving
- Bloodborne pathogens, Back hand safety, Confined Space
- Lockout/Tagout, Basic Electrical Safety
- Slips, Trips, & Fall Protection Awareness, Working Surfaces
- Hazwoper Awareness, Emergency Response, Marine & Trash Debris
- Benzene, Asbestos, & NORM Awareness
- Has Com, DOT HM 126
- PPE, Hearing Conservation
- Alcohol & Substance Abuse Training
- H2S Safety, Respiratory Protection
- Incipient Fire Fighting, Welding, & Compressed Gas

Horizontal Directional Drilling Projects – River and Roads Directional Drilling

- Houston Fuel Oil Terminal (Client – Sunland Construction) 36" Auger bores and slick bores. New construction pipeline install
- Cheniere (Client – M G Dyess) 36" pilot guided auger bore installation. New construction pipeline install.
- Epic (Client – Holloman) 24" & 30" HDD install. Big Lake, TX – Sonora, TX.
- Targa Resources (Client – Troy Construction) 30" HDD Houston TX. Various HDD's for new pipeline install.

Horizontal Directional Drilling Projects – Boots Smith

- Plains All American Pipeline: (Client: Energy Services South) Diamond Pipeline project. Colt, AR. Subcontracted to perform various length HDD's and Road Bores throughout the project. Contract Value ~ \$3M

Pipeline Construction Projects – Boots Smith

- Energy Transfer: Monahans, TX 2016. Vaquero to Waha pipeline project. Successfully install 7.5 miles of new construction 12" pipeline. Included launcher and receiver sites on both ends with meter station and electrical building. Several short road bores. Completed project within a

very tight schedule provided by Energy Transfer. Contract Value ~ \$2M

- Hess: Tioga, ND 2016. Hawkeye completion project. Remobilize and complete portion of the Hawkeye project, as well as additional work. Due to the delay of Corps of Engineers permitting, the original contract for the remaining portion was renegotiated and extra work was added to the scope. I had the authority to renegotiate with upper level Hess management to successfully establish a mutually favorable deal to move forward. Contract Value ~ \$8M
- Hess: Tioga, ND 2015. Hawkeye pipeline project consisting of approximately 26 miles of dual 12" pipeline along with the installation of fabrication (launchers, receivers, mainline valves, risers). Scope also consists of an approximate 2.5 mile slick line (fiber optic) installed inside an 8" carrier pipe under Lake Sakakawea. Fiber optic cable will be pushed/pulled through a 4" carrier duct piping. Involved in the engineering and planning of the FOC install. Contract Value ~ \$50M
- Hess: Weatherford, TX 2015. Fabrication of several launchers, receivers, and mainline valve settings for the 2015 Hawkeye pipeline project. Facilities to be fabricated in Weatherford, TX and delivered to North Dakota for final install.
- Regency: Castor, LA 2014 & 2015. New construction of 44 miles of 10" pipeline.
- Hess: Tioga, ND 2014 & 2015. Preliminary survey and foreign service locate for the Hawkeye Pipeline Project.
- Hess: Tioga, ND 2014 6 miles of 24" new installation. Several HDD's including a sensitive wetland area HDD approx. 900'. Fabrication and install laterals and valves. Contract value ~ \$20M
- Williams: Kentwood, LA 2014 Change out 2 – 42" valves. Fabricate and install 1 – 42" Launcher. Contract value ~ \$1M
- Energy Transfer: Groveton, TX 2014 Fabricate and install 12" launcher and receiver at the Groveton Meter Station. Contract value ~ \$1M
- Hess: Tioga, ND 2013 1 mile of 24" new installation. 24" laterals installation. 4.5 miles of multiple line installation 4", 6", and 8" pipe size diameters. Above and below ground piping installation inside Hess Tioga Rail Terminal and Hess Tioga Gas Plant. Including HDD in both locations. Project executed in severe winter conditions. Contract value ~ \$14M
- Plains All American Pipeline: Patterson, LA 2013 3.5 miles of dual 20" installation and meter station piping. Contract value ~ \$8M
- Kinder Morgan: Port Arthur, TX 2013 Replaced 8,000' of 20" by installing 2 – 4,000' HDD's in a wetland area. Entire project was completed in submerged conditions. Water barriers utilized for HDD work area. Entire ROW was accessed by anchored mats. Contract value ~ \$3M
- Hess: Tioga, ND 2012 4 miles of 24" installation. 2,200' of 8". 24" launcher and receiver fabrication and install. Project was completed in severe winter conditions. Contract value ~ \$10M
- Williams: Thibodaux, LA 2012 Change out 10 – 30" Main Line Valves and associated piping. Contract value ~ \$2M
- Energy Transfer: Fort Stockton, TX 2012 11 miles of 16" new installation with launcher and receiver tying into existing line. Contract value ~ \$3M
- Enbridge: Decatur, TX 2012 2 miles of 6" new installation through marshy area. Most of the project was installed using the "push" method. Contract value ~ \$1M
- Crosstex: Saginaw, TX 2012 Install salt separator and associated piping above and below ground inside the Jarvis Compressor Station. Contract value ~ \$1M
- DFW Midstream: Mansfield, TX 2012 Compressor station project started from the ground up. Moved approximately 6,000 cu yd of dirt, formed and poured concrete, all piping above and below ground, set 1 engine. Contract value ~ \$1.5M
- Kinder Morgan: Winnie, TX 2012 Replacement of 2 – 1100' sections of 30" pipe by HDD method. Lowering existing pipeline to make room for water diversion canal. Publicly funded project with certified payroll and governmental guidelines. Contract value ~ \$2M
- Crosstex: Fort Worth, TX 2012 Lowering 16" pipeline. Stopple and bypass. Contract value ~ \$1M
- XTO Energy: Blairsville, PA 2011 8.5 miles of 24" and 1.2 miles of 16" new installation. Several HDD's on the project. Mountainous regions with environmentally sensitive areas. Contract value ~ \$8M
